CATSPACEX

ORIGIN STORY

x.com/catx_spacex

t.me/catspacex

catspacex.com

The story begins on a beautiful morning, at 8:00 AM, October 18, 1963. At the Special Vehicle Test Center in the middle of the Sahara Desert, the rocket Veronique is ready for its great journey. Inside the rocket, a special passenger - the cat C341 - is preparing for an adventure in space. Cat C341 is not just any cat. It has to endure a force of up to 9.5 Gs, nearly twice the force that the Apollo astronauts experienced to travel to the Moon. Despite the difficult experience, C341 returned with wonderful stories and smiles on the faces of cat lovers around the world. The images and stories of C341 have become an inspiration to millions, as it represents courage and exploration.

TOKENOMICS

The world is changing, but at a certain point, when Elon Musk and SpaceX were preparing for space flights, a great idea was born: Commemorating the heroic cats by creating Cat SpaceX Coin. Users can participate in a platform where they can create, share and trade funny memes revolving around the world of space cats. Every time a meme is created and shared, the creator will receive Tokens as a reward for his creativity.

Tokenomics

- **Cat SpaceX (CATX)s**

Total supply

- **341,000,000,000 Tokens**

Marketing (10%):	34,100,000,000 Tokens
Community (50%):	170,500,000,000 Tokens
Development Fund (15%):	51,150,000,000 Tokens
Collaboration and Partnerships (10%):	4,100,000,000 Tokens
Reserves (5%):	17,050,000,000 Tokens
Usage and Trading Incentives (10%):	34,100,000,000 Tokens

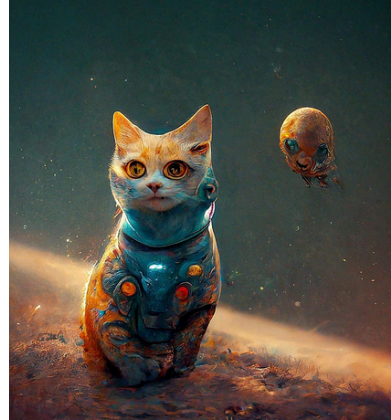

ORIGIN ROADMAP

PHASE 01 INCEPTION AND PLANNING

- Research and idea development: Clarify the vision and mission of Cat SpaceX Coin
- Build a development team: Gather experts in blockchain, marketing, and community development
- Review and develop whitepaper: This will be a detailed guide to the project and development plan.

PHASE 02 PRODUCT DEVELOPMENT

- Smart contract development: Build and test smart contract for Cat SpaceX Coin
- Website and platform development: Create website for project and social media platforms
- Internal testing: Test functionality and security of source code.

ORIGIN ROADMAP

PHASE 03 FUNDRAISING AND COMMUNITY BUILDING

- ICO or IDO Launch: Issue Cat Space X Coin to the community
- Publicity Campaign: Promote the project through media and social media channels
- Community Building: Build and connect with the information community via Discord, Telegram and other channels.

PHASE 04 LAUNCH AND LISTING

- Exchange Listing: Contact exchanges to list the token.
- Community Events: Organize online and offline events to engage with the community.

ORIGIN ROADMAP

PHASE 05 IMPROVEMENT AND EXPANSION

- Develop new features: Collect feedback from users and develop more features for Cat SpaceX Coin.
- Expand strategic partnerships: Seek cooperation with other projects and businesses in the blockchain field.
- Introduce new services: Expand coin-using services such as staking, farming, or DeFi applications. her channels.

PHASE 06 EVALUATE AND IMPROVE

- Project performance analysis: Evaluate the effectiveness and status of the project over a period of time.
- Improvement and optimization: Make necessary adjustments to enhance the user experience and performance of the project.

THANK YOU!
